# NOVA N-4080i 

## On-Counter Presentation <br> Area Imager Barcode Scanner

## Introduction

The NOVA N-4080i is an area imager bar code scanner, it uses digital imaging technology to provide intuitive and blazing reading of 1D and 2D bar codes without sacrificing scanning quality or performance. The N-4080i reader provides great performance and reliability along with a rich feature set to provide excellent value in virtually any desktop presentation barcode scanning system. With the $\mathrm{N}-4080 \mathrm{i}$, not only can identify product pricing barcode label, furthermore, it is able to scan virtually any mobile bar code on various types of display to enhance service levels.

When space is limited but high performance is required, its compact size and footprint make it the ideal solution for space-constrained environments. Its precise imaging scan volume is perfect for hands-free scanning in confined spaces and helps reduce accidental misreads of items, improving productivity and customer satisfaction.

The N-4080i reader includes a powerful configuration tool which allows easy integration into existing or new host systems, and allows management to manage maintenance.
