World 1st portable multi-dimensioning measurement device

VM200 & Overhead parcel dimensioning system VM600/700

The **VM200** (Wired) and **VM200BT** (Wireless), is a compact, handheld and OIML/MID certified multi-dimensional measuring devices, its intuitive reading, unmatched fast performance and optimal price make it the best choice in the dimensioning market.
Built in volume measure and barcode scan, one device with two applications, supports both cuboidal and irregular-shaped dimension measurement.

The **VM600/VM700** is an advanced, overhead parcel dimensioning system that quickly and accurately measures parcels in high-volume shipping applications. It supports various configurable modes to trigger measurement by automatic detection, barcode reading or weighing scale or manually.   The measurement process takes about one second without specific orientation. Cuboidal and irregular-shaped parcels like cylinders, spheres, tubes, polybags and uneven shapes are automatically calculated. You can access its built-in web-based configuration and monitoring tool   from a remote ethernet connection host. Its daily measurement data or snapshot can be transmitted to a designated host by set schedule.

Points of strength

- First portable volume measurement device in the world.

- Mobility and cost-effective are key factors compared to the traditional high cost and not easy movable devices.

- User friendly form factor, convenient and plug-and-play, no need extra calibration.

- Remarkably low weight facilitating hand carry.

- Aimer laser and acoustic buzzer to guide the operator match the most suitable reading area

- Support cuboidal and irregular shape dimensioning measurement.

- Easy to switch between volume measure and barcode scan, one device two applications.

- Auto-trigger is programmable.

- *Easy configuration by scanning setting barcode.*

- *PC applications for data view and record (VMView) and configuration (VMSet).*

- *Simple data output structure via USB or COM, easy integration with other PC/HOST system.*

- *VM200BT can be easily paired up with any Bluetooth mobile device or equipment.*
